EXPERIENCE

Frontend Developer — Chainindustry

MAY 2025 - JAN 2026

- Built and improved features for a platform where users create, complete, and review tasks for rewards
- Developed a delegation feature that lets users assign task reviews to others, helping reduce delays in task reviews.
- Built an in-app onboarding flow for the academy, replacing the old Google Form process.
- Handled API-driven state across features, managing loading, error, and success states to ensure predictable UI behavior.
- Refactored large and inconsistent components, improving code structure, readability, and UI reliability across the app.

Frontend Developer — Adom Labs

Sept 2025 - PRESENT

- Building frontend features across multiple products, turning product requirements into working UI.
- Integrating APIs and handling data states to keep UI behavior predictable and reliable
- Improving responsiveness and usability across devices to ensure a consistent experience

PROJECTS

Chainindustry App

Task platform where users complete simple online tasks and earn in-app rewards (\$CDSP) that can be converted to crypto.

Photoverse

Web app for uploading and organizing photos with authentication and cloud storage.
